About Ryze Chemie

Ryze Chemie is a leading manufacturer of high-quality lab and fine chemicals.

We provide a wide range of essential chemicals for scientific research, industrial applications, and educational purposes.

Vision: Our vision is to lead the future of the fine chemical industry with INNOVATION.

Mission: Our mission is to be in the top 10 lab chemical companies in the world by **2030**.

Range of Products

1. Analytical Reagents/Solutions
2. Laboratory Reagents (LR, Extra Pure & Synthesis)
3. AAS/ICP Standard solution (NIST Traceable)
4. Amino Acids
5. Culture Media
6. "Electronic" Grade Solvents
7. Electronic Grade & Trace Analysis Reagents - "TAR"
8. HPLC/Gradient HPLC Solvents
9. Indicator & Indicator Solutions
10. Molecular Biology Reagents
11. NIST Traceable Buffer Solutions
12. NIST Traceable Volumetric Solutions
13. pH Buffer Solutions
14. Phase Transfer Catalysts
15. Research & Speciality Chemicals
16. Spectroscopy Grades
17. Volumetric Solutions as per USP
18. Diagnostic Reagents
19. Dry Solvents
20. Dyes & Indicator

The screenshot displays the Ryze Chemie website interface. At the top left is the Ryze Chemie logo. A search bar contains the text "Hexane". Below the search bar, there are four search results, each with a right-pointing arrow icon and the following text: "HEXANE, H0009H, HPLC, 99.8%, 110-54-3, C6H14", "HEXANE, H0008A, AR,ACS, 110-54-3, C6H14", "N-HEXANE, H0007H, HPLC, 99.0%, 110-54-3, C6H14", and "N-HEXANE, H0007A, AR,ACS, 99.0%, 110-54-3, C6H14". To the right of the search results is a "CHEMICAL CATEGORY" filter panel. It includes a search icon at the top right, a scrollable list of categories with radio buttons, and a "SELECT AREA OF APPLICATION" section at the bottom with four icons.

Ryze Chemie

Hexane

- HEXANE, H0009H, HPLC, 99.8%, 110-54-3, C6H14
- HEXANE, H0008A, AR,ACS, 110-54-3, C6H14
- N-HEXANE, H0007H, HPLC, 99.0%, 110-54-3, C6H14
- N-HEXANE, H0007A, AR,ACS, 99.0%, 110-54-3, C6H14

CHEMICAL CATEGORY

- All
- HPLC Buffers AND Solvent
- Special Dried | Dry Solvents
- Head-Space Analysis Solvents | GC Grade Solvents

SELECT AREA OF APPLICATION

Four icons representing different application areas are shown below the filter panel.

Product Quality Description

AR & ACS

These chemicals meet the rigorous standards of analytical reagent (AR) and American Chemical Society (ACS) specifications. They are ideal for high-precision analytical work, research, and applications where purity and consistent quality are essential. Our strict quality control ensures minimal impurities and reliable performance.

Special Grades

Special grade chemicals are customized to meet specific customer requirements. They are tailored for unique applications and may include specific purity levels, packaging, or other specifications not covered by standard grades.

HPLC

Specifically designed for HPLC applications, these solvents minimize baseline noise and interference. They are rigorously tested to ensure optimal separation and detection of analytes, making them essential for accurate chromatographic analysis.

GC (Gas Chromatography)

Tailored for gas chromatography, these solvents offer exceptional purity and low residue levels. This minimizes column contamination and ensures reliable peak identification and quantification, crucial for successful GC analysis.

Gas Chromatography - Headspace

Optimized for headspace gas chromatography, these solvents exhibit minimal volatile impurities. This reduces background interference, enabling accurate detection and analysis of volatile compounds from various sample matrices.

Product Quality Description

Dry Solvent

With extremely low moisture content, these solvents are ideal for moisture-sensitive reactions and analyses. Rigorous drying processes ensure optimal performance and prevent unwanted side reactions or inaccurate results.

EL (Extra Pure)

Offering a balance of purity and cost-effectiveness, these chemicals are suitable for general laboratory use and less demanding applications. They undergo quality controls to meet specified purity levels, making them a reliable choice for routine tasks.

HPLC GRADIENT GRADE

These solvents are specially formulated for gradient elution HPLC. They exhibit consistent properties across a range of solvent compositions, ensuring reproducible separations and reliable results even in complex gradient methods.

LCMS

Designed for LCMS applications, these solvents minimize background noise and ionization suppression. Their high purity and low ion content ensure optimal sensitivity and accurate mass spectrometric detection of analytes.

LR (Laboratory Reagent)

Suited for general laboratory use and educational purposes, these chemicals offer reliable quality at an economical price. While not as pure as higher grades, they are suitable for many routine applications and less demanding analyses.

Handling & Usage:

1. Read the label before opening the container.
2. Check that the chemical is the one required.
3. Consider the hazards, including violent reactions between chemicals, and use appropriate protective clothing and equipment.
4. Open the container carefully in a well-ventilated area.
5. Take care while extracting and using hazardous chemicals and use methods that reduce the risk of inhalation, ingestion, and contact with skin, eyes, and clothing.
6. Avoid using contaminated apparatus and instruments.
7. Seal the container tightly after use.
8. Do not eat, drink, or smoke while handling and using chemicals.
9. Wash hands and exposed areas regularly and change contaminated clothing.
10. Deal with spillages using proper precautions and methods appropriate to the hazards.
11. Deal with spillages using proper precautions and methods appropriate to the hazards.
12. Seek medical attention immediately, if affected by chemicals, and use appropriate first aid until medical attention is available.

Storage:

1. Preferable storage temperature has been mentioned for some items wherever required & where the storage temperature has not been mentioned it is to be stored at room temperature, which is regarded as 15-30°C.
2. Store in a dry, well-ventilated area protected from extremes of temperature and sources of ignition.
3. Secure chemicals from unauthorized use.
4. Segregate stock to reduce hazards.
5. Inspect stock from time to time and dispose of deteriorated materials.
6. Do not smoke where flammable chemicals are stored.
7. Take care in handling containers with hazardous residues.

Certificate of Analysis

With our latest innovation, accessing our Certificate of Analysis (CoA) has become effortless. Scan the QR code on the product label directly into your mobile device or any other gadget. Just use a QR code scanner on your phone, desktop, or tablet to access the information.
